

## HAUS AM WALD, STUTTGART

THE VIDEO **NOW** ON OUR  
YOUTUBE CHANNEL

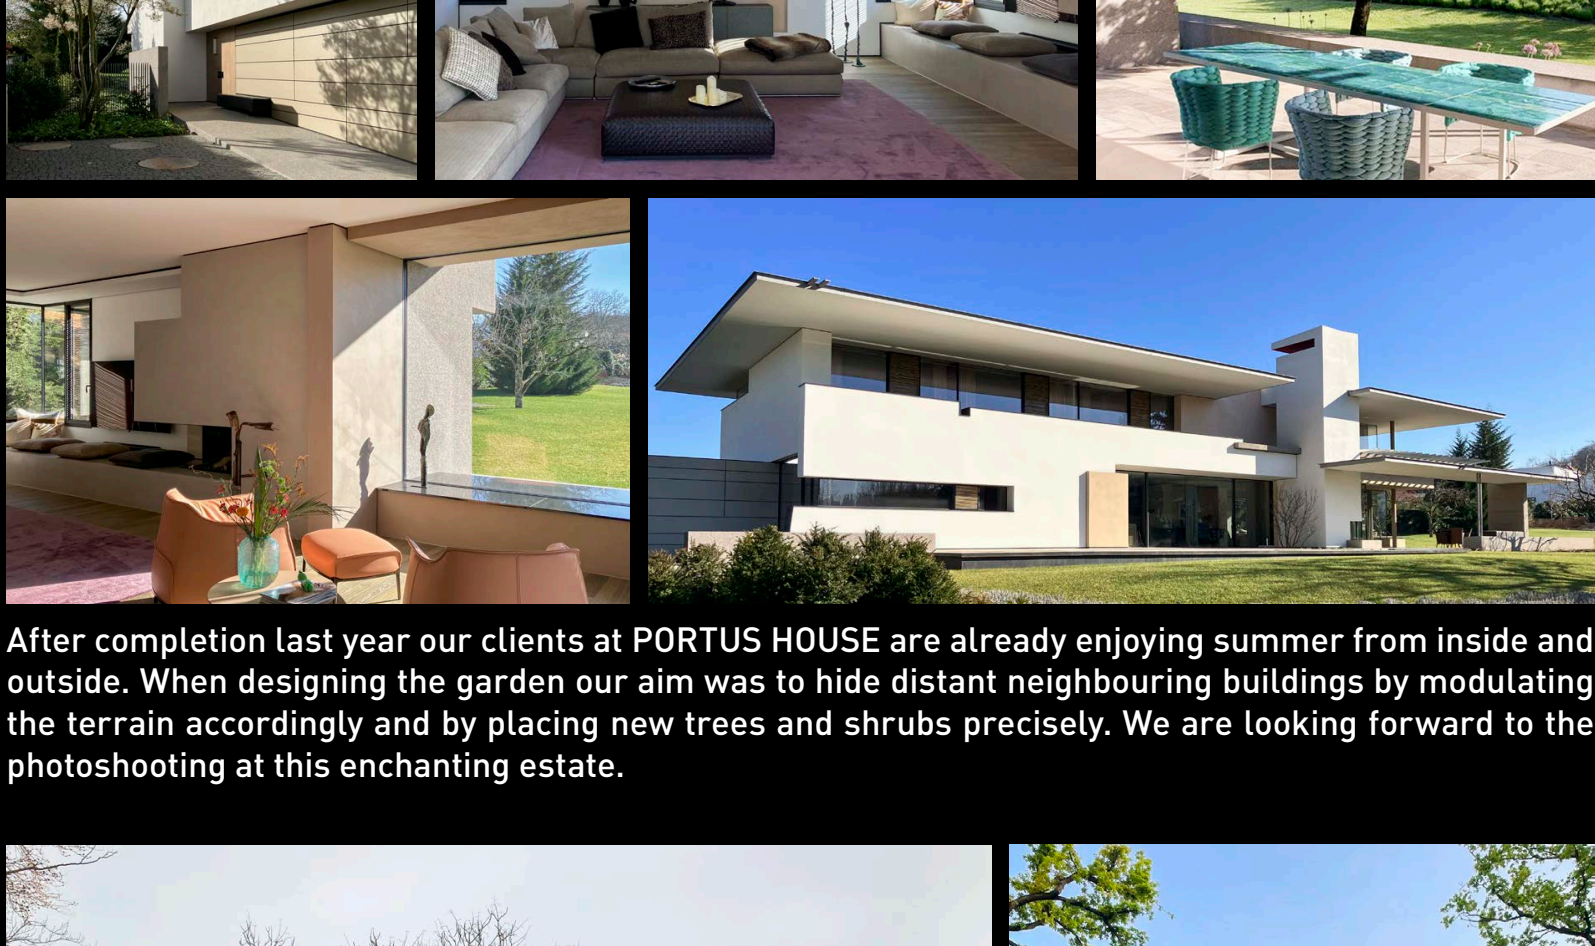

Sometimes we are very fast but sometimes things take a little more time :) :)  
Six years after completing HAUS AM WALD we now have finished the video

## IMPRESSIONS FROM CURRENT PROJECTS

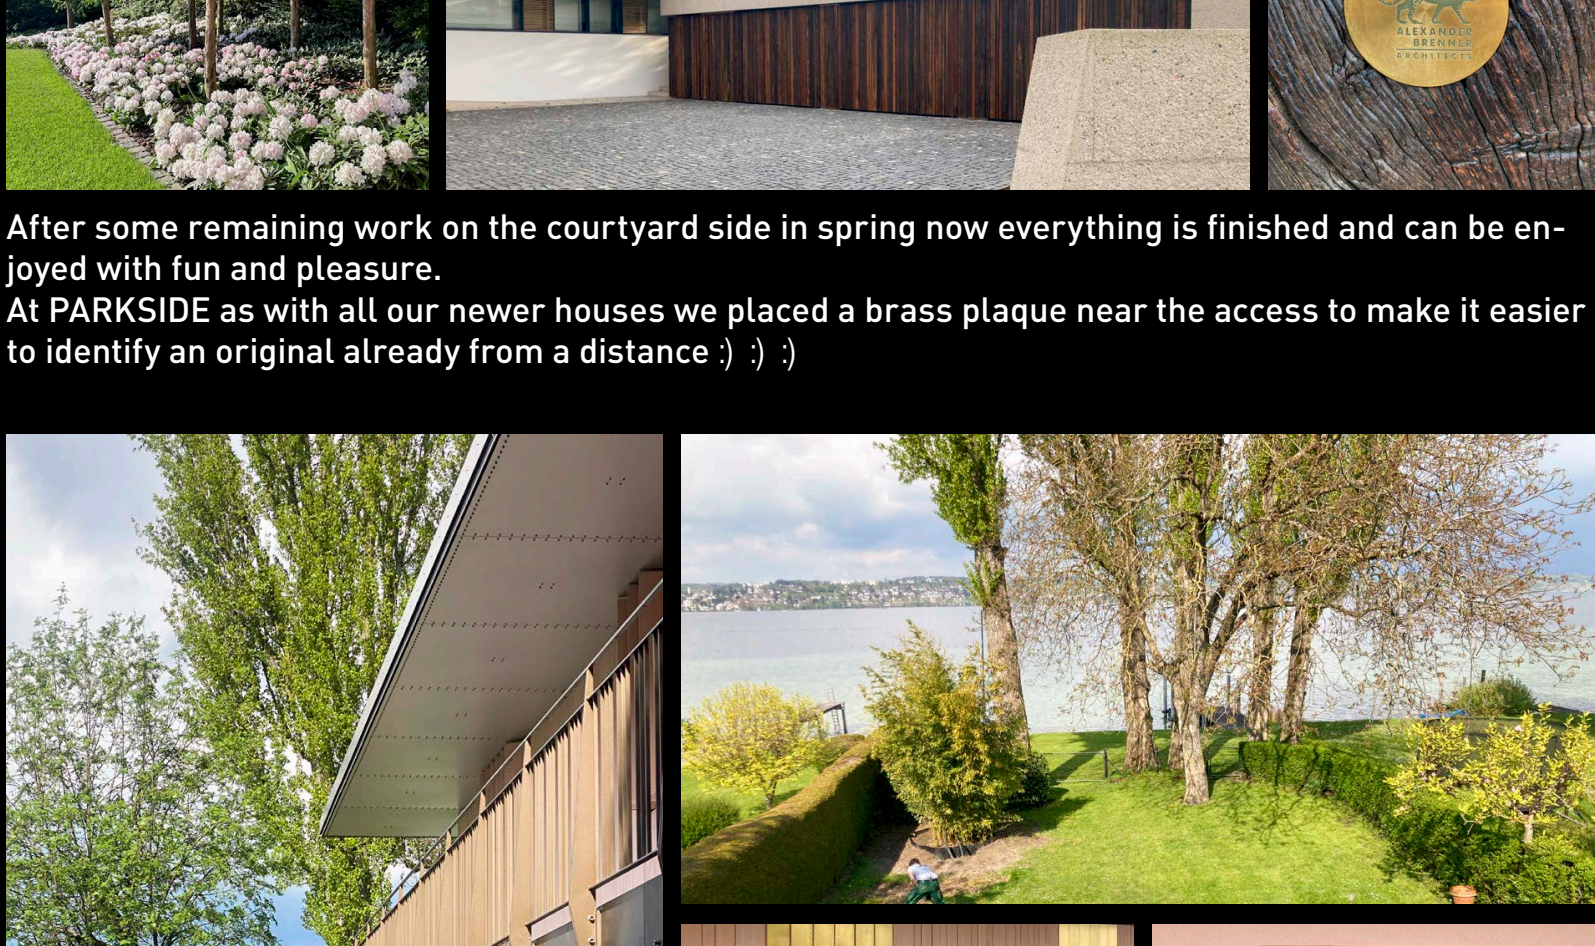

### GARDENING AT TANK HOUSE

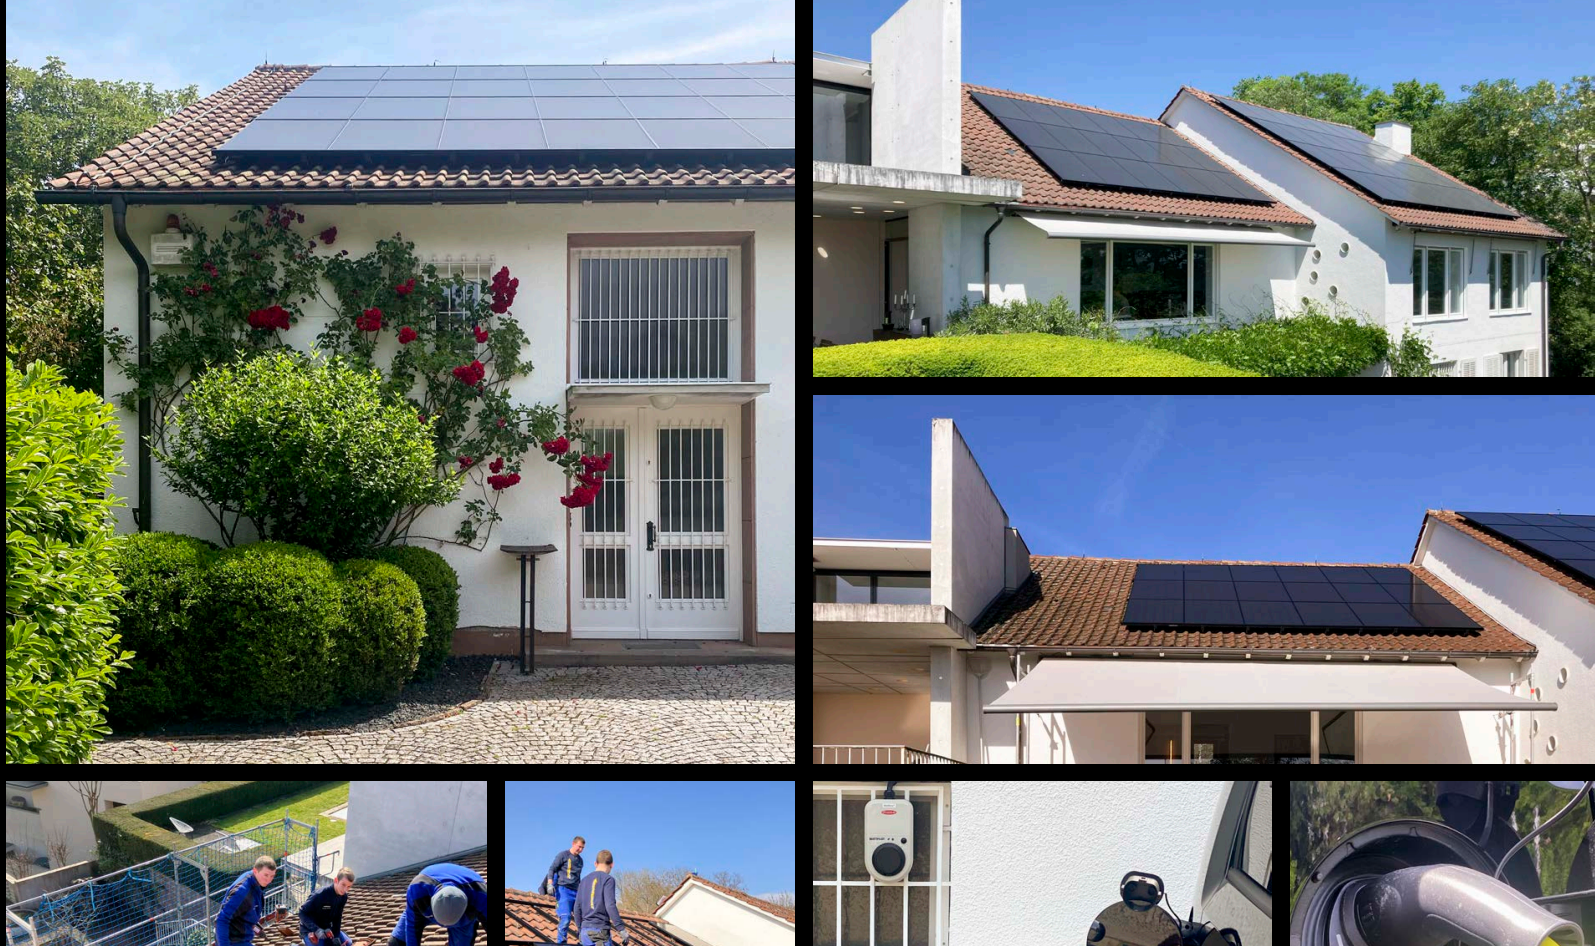

A great advantage of our construction method is that we can start with the realisation of our garden design immediately after the shell has been completed. This means that the house will already have grown in nicely when the residents move in.

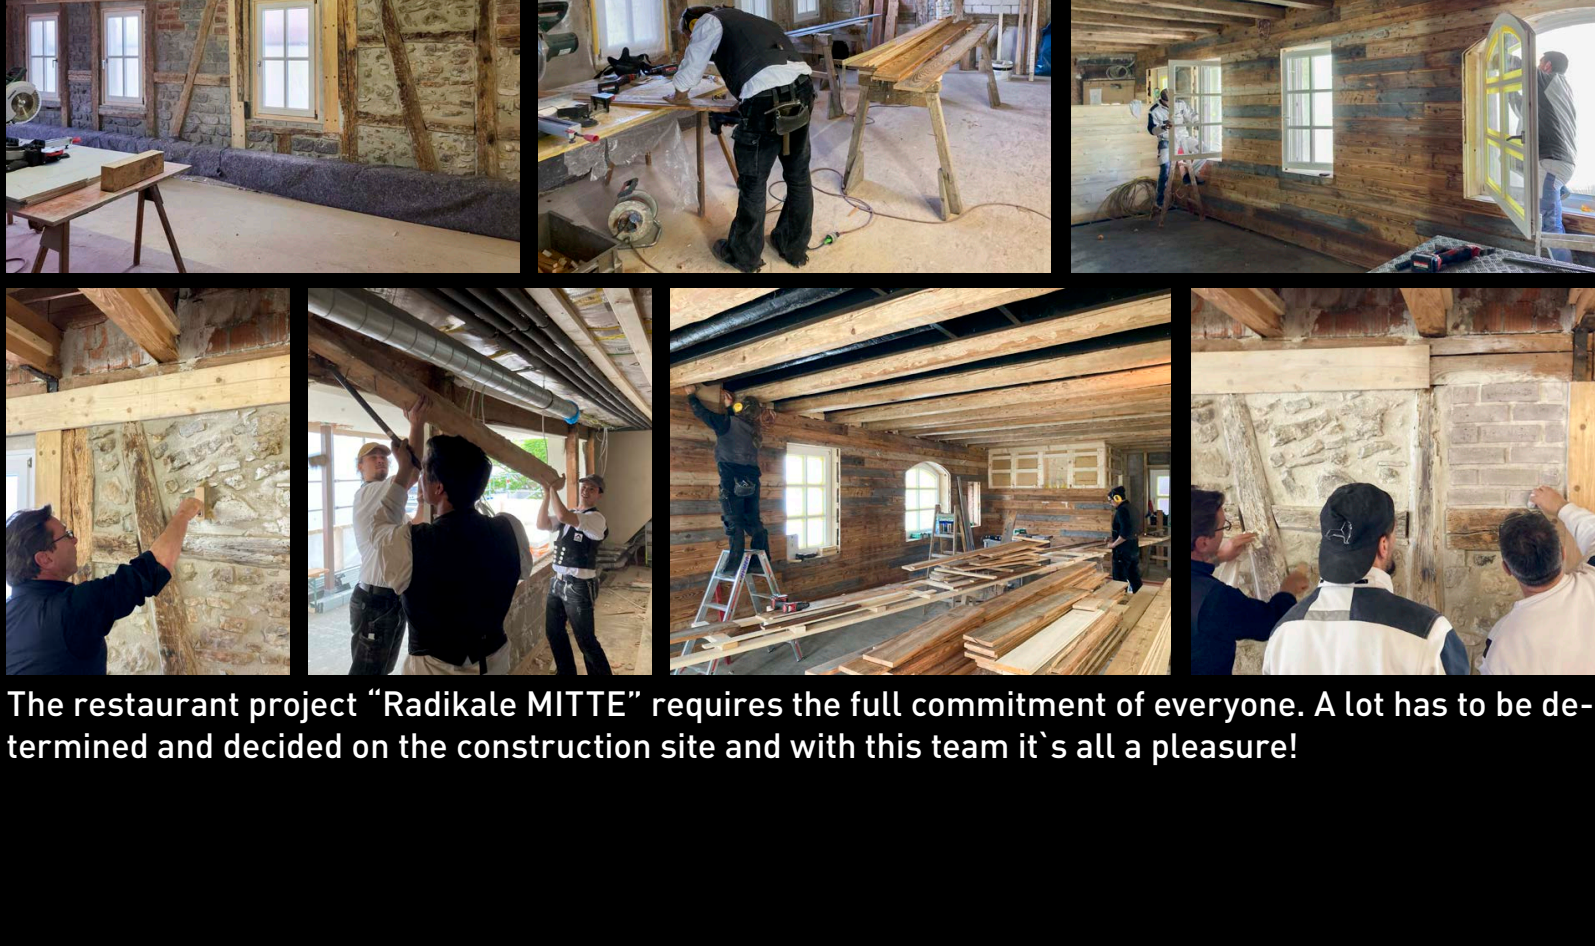

After completion last year our clients at PORTUS HOUSE are already enjoying summer from inside and outside. When designing the garden our aim was to hide distant neighbouring buildings by modulating the terrain accordingly and by placing new trees and shrubs precisely. We are looking forward to the photoshooting at this enchanting estate.

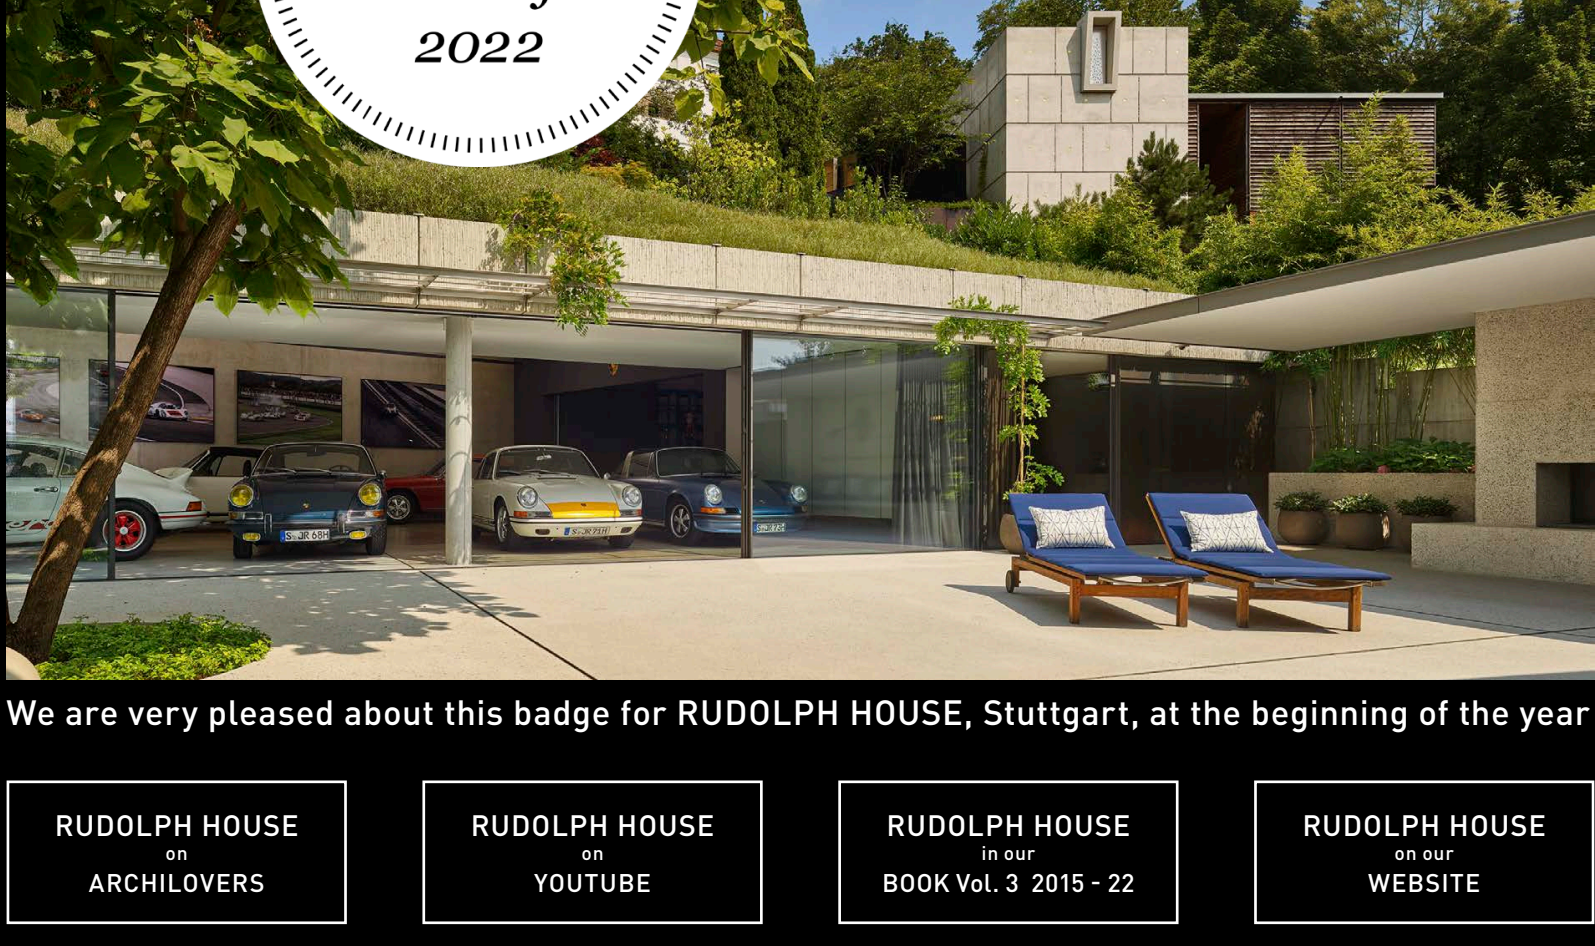

After some remaining work on the courtyard side in spring now everything is finished and can be enjoyed with fun and pleasure. At PARKSIDE as with all our newer houses we placed a brass plaque near the access to make it easier to identify an original already from a distance :) :)

Final details, the piazza and the garden at LAKE HOUSE were completed just in time. ... so our clients are now looking forward to a joyful and relaxed "summer-lake-time".

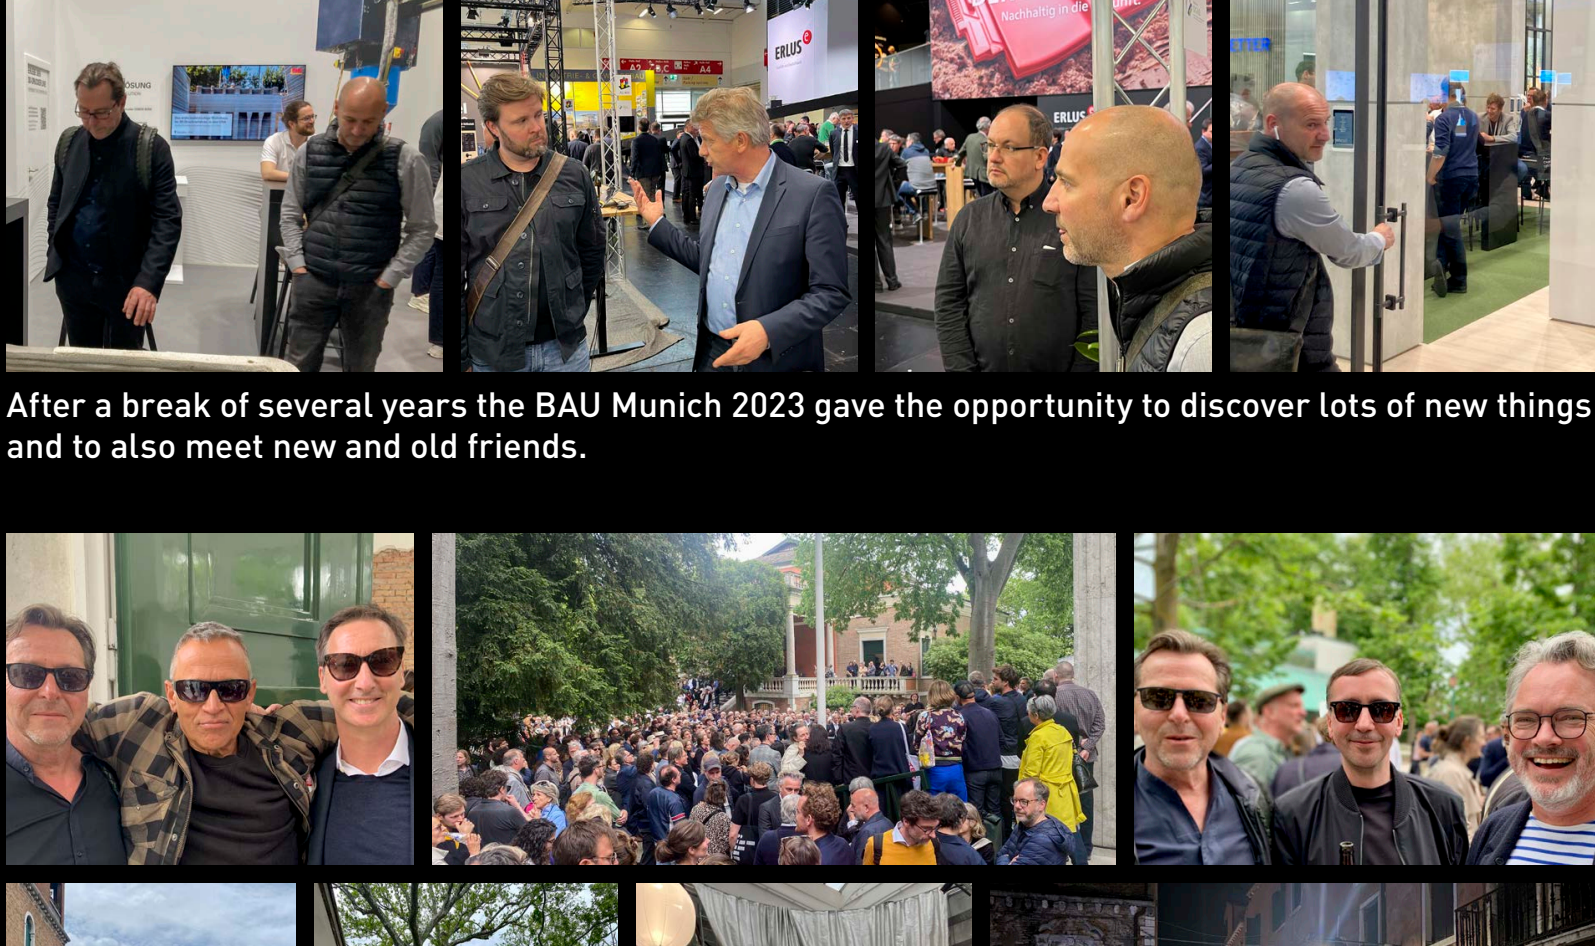

Nowadays it's not so easy to complete a solar project, especially if you want to work only with German products. So we are now happy to cover almost all of our ateliers energy needs by the sun and to provide our colleagues with REAL green power.

The restaurant project "Radikale MITTE" requires the full commitment of everyone. A lot has to be determined and decided on the construction site and with this team it's all a pleasure!

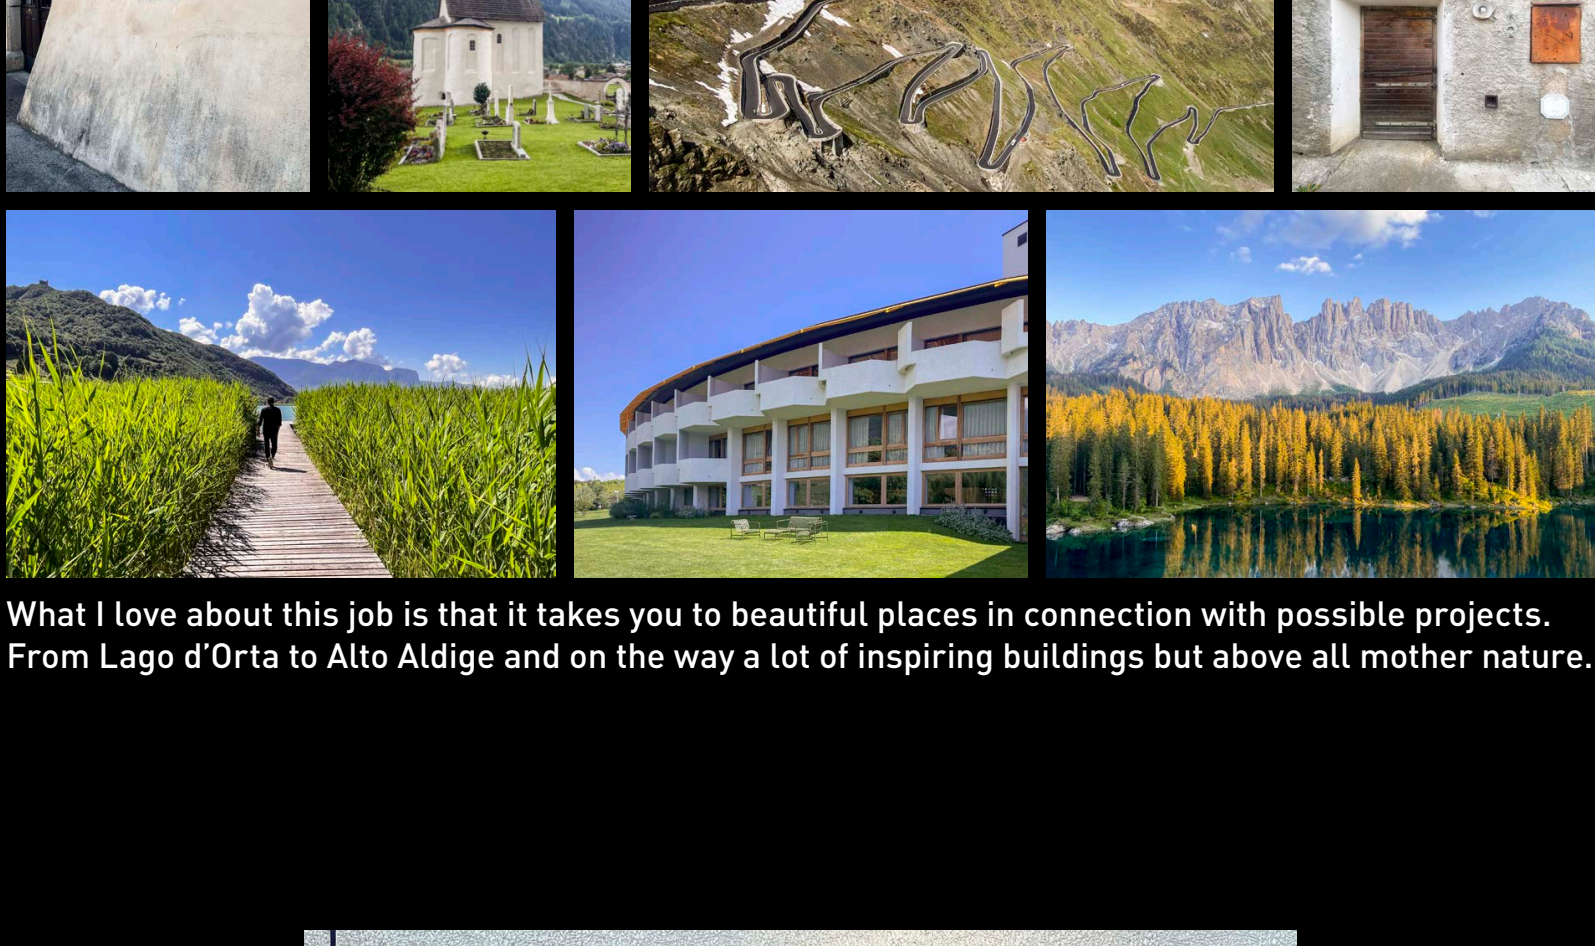

## IN THE FIRST HALF OF THE YEAR . . .

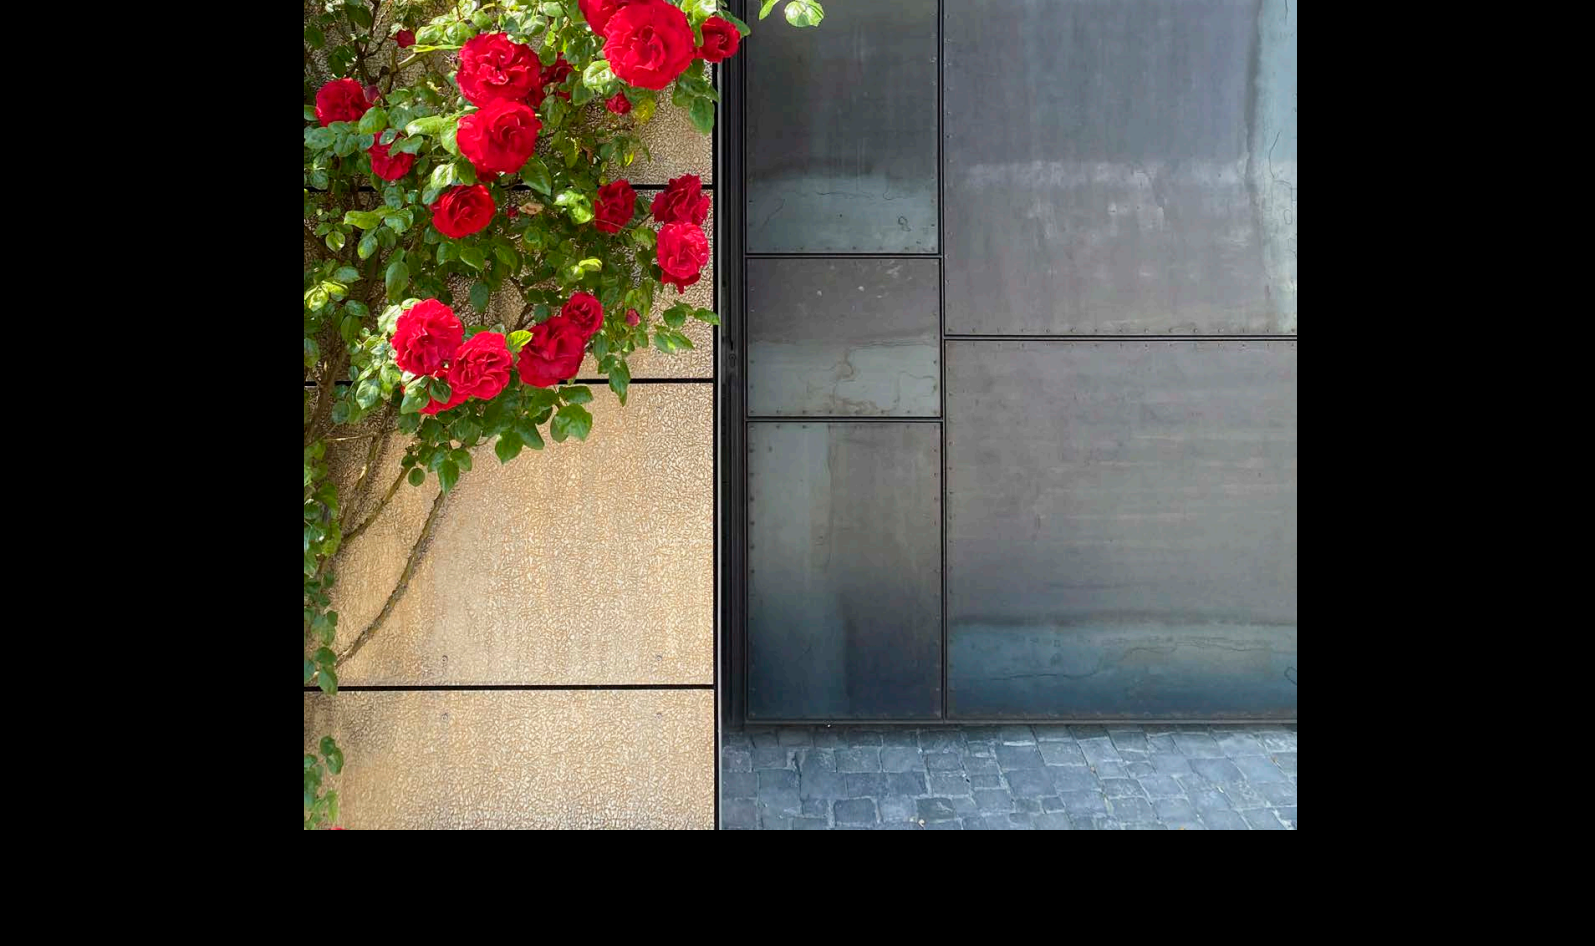

We are very pleased about this badge for RUDOLPH HOUSE, Stuttgart, at the beginning of the year

Right at the beginning of the year a project took me to this beautiful island . . . and besides you can visit a lot of inspiring places and buildings in Mallorca.

After a break of several years the BAU Munich 2023 gave the opportunity to discover lots of new things and to also meet new and old friends.

Also possible again after many years, attending the opening of the Architectural Biennale in Venice. Exciting days, interesting events and a great exchange with dear colleagues.

Always worth a visit - the Domnick Collection in Nuertingen and its sculpture garden, a masterpiece designed by architect Paul Stohrer in 1967.

What I love about this job is that it takes you to beautiful places in connection with possible projects. From Lago d'Orta to Alto Adige and on the way a lot of inspiring buildings but above all mother nature.

And now to finish

**39 ROSES FOR YOU**

who read up to this point

Thanks
